

CHRYSALIS AWARD FOR REMODELING EXCELLENCE

2007 Best Whole House Remodel \$200K - \$500K

This project transformed a small, unattractive home into a strikingly beautiful, spacious, energy efficient home. Originally cramped for space, with the laundry area hidden in a basement accessed by steep, narrow stairs, the laundry is now a part of a second floor addition that holds a large master suite with its own private balcony patio, guest suite with private bath, and large walk-in cedar closet. The downstairs now includes extensive living space designed for both entertaining and relaxing, including two screened porches, beautifully renovated kitchen, media room, home office, along with living room, dining room and a full bath.
