

Pinnacle Custom Builders, Inc.

2010 Best Addition \$100,000 - \$250,000

This project doubled the size of the house, while also increasing the energy efficiency of the home. By adding a full second floor and moving all bedrooms and laundry upstairs, the homeowners gained a larger kitchen with a new den and a separate playroom for the kids. The house is now twice its original size, yet the heating and cooling bills were actually reduced. The family now has the room needed to continue growing as well as room to entertain family and friends.
